OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

November 14, 2016

E-MAILED

OPP Decision Number: 519790

Cinda Bell
Agent for Taminco US LLC
c/o SciReg, Inc.
12733 Director's Loop
Woodbridge, VA 22192

Subject: Application Deficiency- Chlormequat Chloride Import Tolerance
Petition Number: 6E8495
Application Date: 7/20/2016
EPA Receipt Date: 7/20/2016

Dear Ms. Bell:

The Agency has received and begun its in-depth review of the subject application and has determined that it is incomplete or that further information is needed. This letter is a written notification of those deficiencies and identifies your options under 40 CFR 152.105. Please ensure that you consider each of the options below in determining how and when you respond to this letter.

Pursuant to 40 CFR 152.105, you are allowed 75 calendar days from the date of this letter to provide a response concerning the deficiencies listed in this letter. Your response may include making corrections or additions to complete the application, or notifying the Agency of the date on which you expect to complete the application, or withdrawing your application. If you do not respond to this letter within 75 calendar days or if you respond with a date on which you expect to complete the application but fail to meet that scheduled date, the Agency will treat the application as if you had withdrawn it. Withdrawal concludes the Agency's review of your application. Any subsequent submission of the same application must then be submitted as a new application with a new deadline for EPA to make a determination on your application and subject to a new registration service fee.

The following deficiency has been identified by the Agency:

1. The Agency has denied your request to waive the Acute Neurotoxicity (ACN) test. The missing and required ACN study must be submitted for incorporation into the import tolerance human health risk assessment. In harmony with current practice, the Agency accepts only complete application packages containing all required guideline studies.

To proceed with this action, the Agency requires a timely submission of the ACN study. Please submit a detailed plan for the completion and date certain submission of the ACN study. Depending on when the study is submitted, a possible PRIA due date extension may be necessary.

Further review of your application and your response to the deficiencies may identify additional deficiencies and you will be so informed.

Please respond to this letter within 75 calendar days of the stamped date by contacting Lindsay Roe by telephone on 703-347-0506 or by e-mail at roe.lindsay@epa.gov or Tony Kish by telephone on 703-308-9443 or by email at kish.tony@epa.gov during the hours of 9:00 am to 6:00 pm EST with a response and for any questions concerning this letter. When submitting information or data in response to this letter, a copy of this letter should accompany the submission to facilitate processing.

Sincerely,

Tony Kish, Product Manager 22
Fungicide Branch
Registration Division (7505P)
